Royal Cyber Inc.

Software Company of the Year 2018 – USA & Best Transaction Monitoring Solution: Monitor Pro

Royal Cyber Inc. is a leading software organization that provides digital services ranging from application development and deployment to training and consultancy. Having recognized the firm in our prestigious Technology Elite Awards for 2018, we profile it to learn more about the work it does and the success it has achieved over the years.

Since its inception in 2002 Royal Cyber has worked tirelessly to provide its clients with innovative solutions that meet their needs in the fast-paced software market.

Today, Royal Cyber is an award-winning business solutions provider that serves organizations across different industry verticals around the globe. A leader in delivering world-class commerce and enterprise solutions, the company helps organizations streamline business operations and compete in the global marketplace by focusing on a range of cutting-edge technologies and solutions such as IBM Middleware Transaction Monitoring - Monitor Pro, Watson, IoT, ChatBoT, RPA, AWS/Azure Cloud, Test Automation (TEAF) and Mobility that redefine businesses worldwide.

Collaboration has helped the firm to ensure it can support clients with solutions for any technology or requirement. Royal Cyber is an IBM Gold Business Partner, SAP (Hybris), and Microsoft Gold Certified partner. The firm also holds partnerships with prestigious organizations including Amazon, Adobe, Salesforce, MuleSoft and Dell Boomi.

Thanks to these collaborations and the firm's focus on excellence, Royal Cyber offers its clients a strong portfolio covering multiple verticals and industries to provide comprehensive IT services. Alongside this, the firm also provides professional services to clients to help them meet their business objectives, helping its customers to evolve their strategies to best use the strengths made available due to the current network-based technologies and concepts.

Among its many services, Royal Cyber can help its clients to adopt e-commerce solutions, manage online databases and deal with web security concerns, to develop applications and software systems on intranets for them to helping them achieve a better relationship with their customers and vendors, cut costs, or move towards new competitive advantages. The firm's team is equipped with experts in each technical area of software engineering and an efficient management group. They focus on working on the latest and most robust, scalable and manageable technologies and tools available to ensure that Royal Cyber remains at the forefront of emerging market developments, providing clients with cutting-edge solutions they can rely on.

Client service is also paramount to the firm's success, and as such Royal Cyber has dedicated department teams where everybody is focused on their respective job roles and make sure that clients get the exceptional services and solutions. This helps drive client loyalty and ensures that every client gets the support they need. Royal Cyber provides client services globally using its Onshore/Offshore Model.

With the future stretched ahead of it, Royal Cyber firmly believes that the technology industry is leading the 21st century and will continue to adapt and thrive over the years to come. As such, the team are excited and putting all their efforts into building innovative solutions that can make the difference. These include solutions in key areas such as AI, IoT and Blockchain, all of which will ensure that Royal Cyber remains at the forefront of the latest developments in the software market and able to offer clients solutions that meet their ever-evolving requirements.
